^{*1}This list does not apply to Corporate Health Services, BlueCard, Federal Employee Program (FEP) or National Accounts. Some large (100+) groups may customize certain benefits, including adding or deleting precertification requirements.

^{*2} When medications are supplied by the Home Health Agency for use in a setting other than the home (i.e., for dispensing in physician offices), precertification is not required. However, these services will be reviewed retrospectively for medical necessity, pre-existing conditions, waivers and all other contract provisions, including exclusions and limitations.

^{*3} Medications with the “Specialty Injectable” notation (✓) may be available through the member's specialty self-injectable medication benefit, if applicable.
