## HORMONE PELLETT THERAPY

---

Non-Discrimination Statement and Multi-Language Interpreter Services information are located at the end of this document.

Coverage for services, procedures, medical devices and drugs are dependent upon benefit eligibility as outlined in the member's specific benefit plan. This Medical Coverage Guideline must be read in its entirety to determine coverage eligibility, if any.

This Medical Coverage Guideline provides information related to coverage determinations only and does not imply that a service or treatment is clinically appropriate or inappropriate. The provider and the member are responsible for all decisions regarding the appropriateness of care. Providers should provide BCBSAZ complete medical rationale when requesting any exceptions to these guidelines.

The section identified as "Description" defines or describes a service, procedure, medical device or drug and is in no way intended as a statement of medical necessity and/or coverage.

The section identified as "Criteria" defines criteria to determine whether a service, procedure, medical device or drug is considered medically necessary or experimental or investigational.

State or federal mandates, e.g., FEP program, may dictate that any drug, device or biological product approved by the U.S. Food and Drug Administration (FDA) may not be considered experimental or investigational and thus the drug, device or biological product may be assessed only on the basis of medical necessity.

Medical Coverage Guidelines are subject to change as new information becomes available.

For purposes of this Medical Coverage Guideline, the terms "experimental" and "investigational" are considered to be interchangeable.

## HORMONE PELLETT THERAPY (cont.)

### Description:

Hormone pellets are implanted under the skin through a small incision to deliver hormones into the bloodstream. The procedure is usually performed in the physician's office using a local anesthetic.

Implantable hormone pellets include the following:

- Estradiol
- Estrogen
- Estrogen compounded with testosterone
- Testosterone. Testopel® is the only FDA-approved testosterone pellet available to help restore testosterone levels in men with low testosterone.

---

### Criteria:

For subcutaneous hormone pellet therapy and other hormone therapy for gender dysphoria, see BCBSAZ Medical Coverage Guideline #O922, "*Treatments for Gender Dysphoria*".

For testosterone therapy for males and females, see BCBSAZ Medical Coverage Guideline #O657, "*Testosterone Replacement Therapy*".

- Subcutaneous hormone pellet implants for the following indications are considered ***experimental or investigational*** based upon:
1. Insufficient scientific evidence to permit conclusions concerning the effect on health outcomes, and
  2. Insufficient evidence to support improvement of the net health outcome, and
  3. Insufficient evidence to support improvement of the net health outcome as much as, or more than, established alternatives.

These indications include, *but are not limited to:*

- Hormone replacement therapy in females
- Hormone replacement therapy in males
