ELECTRICAL STIMULATION

Non-Discrimination Statement and Multi-Language Interpreter Services information are located at the end of this document.

Coverage for services, procedures, medical devices and drugs are dependent upon benefit eligibility as outlined in the member's specific benefit plan. This Medical Coverage Guideline must be read in its entirety to determine coverage eligibility, if any.

This Medical Coverage Guideline provides information related to coverage determinations only and does not imply that a service or treatment is clinically appropriate or inappropriate. The provider and the member are responsible for all decisions regarding the appropriateness of care. Providers should provide BCBSAZ complete medical rationale when requesting any exceptions to these guidelines.

The section identified as “Description” defines or describes a service, procedure, medical device or drug and is in no way intended as a statement of medical necessity and/or coverage.

The section identified as “Criteria” defines criteria to determine whether a service, procedure, medical device or drug is considered medically necessary or experimental or investigational.

State or federal mandates, e.g., FEP program, may dictate that any drug, device or biological product approved by the U.S. Food and Drug Administration (FDA) may not be considered experimental or investigational and thus the drug, device or biological product may be assessed only on the basis of medical necessity.

Medical Coverage Guidelines are subject to change as new information becomes available.

For purposes of this Medical Coverage Guideline, the terms "experimental" and "investigational" are considered to be interchangeable.

All other trademarks and service marks contained in this guideline are the property of their respective owners, which are not affiliated with BCBSAZ.
ELECTRICAL STIMULATION (cont.)

Description:

Accelerated Recovery Performance ARPwave™:
ARPwave consists of a table top electrical generator with software controlled parameters and electrodes. It has been investigated to both determine the specific sites where treatment is needed and to deliver treatment. Direct electrical current and a patented bioelectrical current are used simultaneously with exercise techniques for rehabilitation following surgery and for pain treatment.

Form-Fitting Conductive Garment:
Customized body-contoured garment for electrical stimulation. All electrodes and lead wires are sewn into the garment to simplify lead placement and minimize setup time.

High Voltage Galvanic Stimulation (HVGS):
An interrupted, pulsed direct current that causes electrochemical changes at the cellular level. The cellular changes cause reflex vasodilation that may be effective in controlling localized pain. HVGS is also known as High Voltage Pulsed Current (HVPC), Electro-galvanic Stimulation, or Hi-Volt.

Micro Current Therapy™:
Micro current therapy, also known as microcurrent electrical neuromuscular stimulation (MENS), is a small, ‘band-aid’ sized device attached directly to the skin over the intended treatment area. Once activated, produces a low amperage, pulsating electrical current that radiates into the affected area, attracting blood and oxygen to the injured part and stimulating the body’s healing process.

Rebuilder® System:
A transcutaneous nerve and muscle stimulator that has been investigated for pain relief by opening nerve pathways, causing muscles to contract and relax and stimulating the brain to release endorphins. Consists of controller and electrode pads that are placed directly on affected area.

Sympathetic Therapy:
Delivers electrical current via four electrodes placed strategically on the lower legs and feet, or on the arms and hands. The electrodes access the autonomic nervous system through the peripheral nerves with the intent of altering or masking the perception of chronic systemic pain. Known as Dynatron STS® and Dynatron STS® Rx Therapy System.

Transcutaneous Electrical Modulation Pain Reprocessing (TEMPR):
TEMPR, also known as Scrambler Therapy®, is a multi-channel electrical stimulation device that allows simultaneous treatment of a number of pain sites. Stimulation impulses are generated and controlled according to a stored program to provide pain relief by interrupting transmission of pain signals by delivering electrical stimulation that is interpreted by the nervous system as no pain.

Treatment involves the initial physician consultation to discern the most effective electrode placement points followed by interactive physician-supervised treatment sessions that typically last one hour. Treatment is administered in the physician office setting under direct supervision to treat neuropathic pain, including pain associated with chemotherapy-induced peripheral neuropathy. Devices include, but are not limited to, CALMARE® device.
ELECTRICAL STIMULATION (cont.)

Criteria:

For treatment of arthritis, see BCBSAZ Medical Coverage Guideline #O876, “Electrical Stimulation for Treatment of Arthritis”.

For interferential current stimulation, see BCBSAZ Medical Coverage Guideline #O875, “Interferential Current Stimulation”.

For neuromuscular electrical stimulation (NMES), see BCBSAZ Medical Coverage Guideline #O365, “Neuromuscular Electrical Stimulation”.

For transcutaneous electrical nerve stimulation (TENS) for treatment of wounds, see BCBSAZ Medical Coverage Guideline #O671, “Electrostimulation and Electromagnetic Therapy for the Treatment of Wounds”.

For HVGS for treatment of wounds, see BCBSAZ Medical Coverage Guideline #O671, “Electrostimulation and Electromagnetic Therapy for the Treatment of Wounds”.

 HVGS is considered medically necessary for ANY of the following:

1. Symptomatic relief of chronic (3 months or greater), intractable, localized pain
2. Management of post-surgical localized pain when oral or intravenous medications have failed to control pain or are contraindicated

 HVGS for all other indications not previously listed or if above criteria not met is considered experimental or investigational based upon:

1. Insufficient scientific evidence to permit conclusions concerning the effect on health outcomes, and
2. Insufficient evidence to support improvement of the net health outcome, and
3. Insufficient evidence to support improvement of the net health outcome as much as, or more than, established alternatives, and
4. Insufficient evidence to support improvement outside the investigational setting.

These indications include, but are not limited to:

- Labor and vaginal delivery pain relief
- Treatment of dementia
- Treatment of edema
- Treatment of swelling
ELECTRICAL STIMULATION (cont.)

Criteria: (cont.)

- Accelerated Recovery Performance ARPwave therapy is considered experimental or investigational based upon insufficient scientific evidence to permit conclusions concerning the effect on health outcomes.

- Form-fitting conductive garment is considered comfort and convenience and, therefore, a benefit plan exclusion and not eligible for coverage.

- Micro Current Therapy (MCT Patch) is available as an over-the-counter device and is, therefore, considered a benefit plan exclusion and not eligible for coverage.

- Rebuilder System for home use that is obtainable without a prescription is considered a benefit plan exclusion and not eligible for coverage as durable medical equipment under the medical benefit.

- Rebuilder System is considered experimental or investigational based upon:
  1. Insufficient scientific evidence to permit conclusions concerning the effect on health outcomes, and
  2. Insufficient evidence to support improvement of the net health outcome, and
  3. Insufficient evidence to support improvement of the net health outcome as much as, or more than, established alternatives.

- Sympathetic Therapy is considered experimental or investigational based upon insufficient scientific evidence to permit conclusions concerning the effect on health outcomes.

- Transcutaneous Electrical Modulation Pain Reprocessing (TEMPR) for all indications is considered experimental or investigational based upon:
  1. Insufficient scientific evidence to permit conclusions concerning the effect on health outcomes, and
  2. Insufficient evidence to support improvement of the net health outcome, and
  3. Insufficient evidence to support improvement of the net health outcome as much as, or more than, established alternatives, and
  4. Insufficient evidence to support improvement outside the investigational setting.

Non-Discrimination Statement:

Blue Cross Blue Shield of Arizona (BCBSAZ) complies with applicable Federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability or sex. BCBSAZ provides appropriate free aids and services, such as qualified interpreters and written information in other formats, to people with disabilities to communicate effectively with us. BCBSAZ also provides free language services to people whose primary language is not English, such as qualified interpreters and information written in other languages. If you need these services, call (602) 864-4884 for Spanish and (877) 475-4799 for all other languages and other aids and services.

If you believe that BCBSAZ has failed to provide these services or discriminated in another way on the basis of race, color, national origin, age, disability or sex, you can file a grievance with: BCBSAZ’s Civil Rights Coordinator, Attn: Civil Rights Coordinator, Blue Cross Blue Shield of Arizona, P.O. Box 13466, Phoenix, AZ 85002-3466, (602) 864-2288, TTY/TDD (602) 864-4823, crc@azblue.com. You can file a grievance in person or by mail or email. If you need help filling a grievance BCBSAZ’s Civil Rights Coordinator is available to help you. You can also file a civil rights complaint with the U.S. Department of Health and Human Services, Office for Civil Rights electronically through the Office for Civil Rights Complaint Portal, available at https://ocrportal.hhs.gov/ocr/portal/lobby.jsf, or by mail or phone at: U.S. Department of Health and Human Services, 200 Independence Avenue SW., Room 509F, HHH Building, Washington, DC 20201, 1–800–368–1019, 800–537–7697 (TDD). Complaint forms are available at http://www.hhs.gov/ocr/office/file/index.html

Multi-Language Interpreter Services:

Spanish: Si usted, o alguien a quien usted está ayudando, tiene preguntas acerca de Blue Cross Blue Shield of Arizona, tiene derecho a obtener ayuda e información en su idioma sin costo alguno. Para hablar con un intérprete, llame al 602-864-4884.

Navajo: Díí kwe’é atah nílinií Blue Cross Blue Shield of Arizona haada yit’éego bina’idílkidgo éi doodago Háída bíjá aníleedíítít‘áadoo le’é yina’idílkido beehaz’hâníí hóoí díí t’áá hazaak’ehji háká a’doowolgo bee haaz’a doo báqh’ilínnígó. Atá’ hálne’ígí kójí bich’í’ hodíllihí 877-475-4799.

Chinese: 如果您，或是您正在协助的对像，有关于插入项目的名称 Blue Cross Blue Shield of Arizona 方面的问题，您有权利免费以您的母语得到帮助和讯息。洽询一位翻译员，请拨电话 在此插入数字 877-475-4799.

Vietnamese: Nếu quý vị, hay người mà quý vị đang giúp đỡ, có câu hỏi về Blue Cross Blue Shield of Arizona quý vị sẽ có quyền được giúp và có thêm thông tin bằng ngôn ngữ của mình miễn phí. Để nói chuyện với một thống dịch viên, xin gọi 877-475-4799.

Arabic: إن كان لديك أو لدى شخص تساعد أسئلة بخصوص Blue Cross Blue Shield of Arizona فإنك تبلغ من دون اية تكلفة للمحادثة مع مترجم الفصل 877-475-4799.
