MICROORGANISM QUANTIFICATION WITH NUCLEIC ACID PROBES

Non-Discrimination Statement and Multi-Language Interpreter Services information are located at the end of this document.

Coverage for services, procedures, medical devices and drugs are dependent upon benefit eligibility as outlined in the member's specific benefit plan. This Medical Coverage Guideline must be read in its entirety to determine coverage eligibility, if any.

This Medical Coverage Guideline provides information related to coverage determinations only and does not imply that a service or treatment is clinically appropriate or inappropriate. The provider and the member are responsible for all decisions regarding the appropriateness of care. Providers should provide BCBSAZ complete medical rationale when requesting any exceptions to these guidelines.

The section identified as “Description” defines or describes a service, procedure, medical device or drug and is in no way intended as a statement of medical necessity and/or coverage.

The section identified as “Criteria” defines criteria to determine whether a service, procedure, medical device or drug is considered medically necessary or experimental or investigational.

State or federal mandates, e.g., FEP program, may dictate that any drug, device or biological product approved by the U.S. Food and Drug Administration (FDA) may not be considered experimental or investigational and thus the drug, device or biological product may be assessed only on the basis of medical necessity.

Medical Coverage Guidelines are subject to change as new information becomes available.

For purposes of this Medical Coverage Guideline, the terms "experimental" and "investigational" are considered to be interchangeable.

Description:

Nucleic acid probe is a procedure that allows rapid identification of a microorganism’s DNA or RNA. Quantification of the amount of nucleic acids detects how many microorganisms are present. Quantification helps in assessing the response to treatment and serves as a prognostic factor.
MICROORGANISM QUANTIFICATION WITH NUCLEIC ACID PROBES (cont.)

Criteria:

Microorganism Identification Using Nucleic Acid Quantification:

- Nucleic acid probe quantification to identify ANY of the following microorganisms is considered medically necessary:
  1. Cytomegalovirus
  2. Hepatitis B
  3. Hepatitis C
  4. HIV-1 and/or HIV-2
  5. Human herpes virus 6
  6. Influenza virus

- Nucleic acid probe quantification to identify ANY microorganisms not previously listed is considered experimental or investigational based upon:
  1. Insufficient scientific evidence to permit conclusions concerning the effect on health outcomes, and
  2. Insufficient evidence to support improvement of the net health outcome, and
  3. Insufficient evidence to support improvement of the net health outcome as much as, or more than, established alternatives.

These microorganisms include, but are not limited to:

- Bartonella henselae or Quintana
- Borrelia burgdorferi
- Candida species
- Central nervous system pathogen panel
- Chlamydia pneumoniae
- Chlamydia trachomatis
- Gardnerella vaginalis
- Gastrointestinal pathogen panel
- Hepatitis G
- Herpes simplex virus
- Human Papillomavirus (HPV)
- Legionella pneumophila
- Mycobacterium species
- Mycobacterium tuberculosis
- Mycobacterium avium intracellulare
- Mycoplasma pneumonia
- Neisseria gonorrhoeae
- Streptococcus A

Criteria: (cont.)

Infectious Agent Quantification for Transplants:

- Infectious agent detection by nucleic acid quantification for the following indications as part of the workup or monitoring of organ transplantation is considered **medically necessary**:

  These indications include, but are not limited to:

  - Epstein Barr virus (EBV)
  - Parvo B19 virus
  - Polyomaviruses JC/BK
  - Varicella Zoster virus

Resources:

Literature reviewed 01/30/18. We do not include marketing materials, poster boards and non-published literature in our review.

The BCBS Association Medical Policy Reference Manual (MPRM) policy is included in our guideline review. References cited in the MPRM policy are not duplicated on this guideline.

Non-Discrimination Statement:

Blue Cross Blue Shield of Arizona (BCBSAZ) complies with applicable Federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability or sex. BCBSAZ provides appropriate free aids and services, such as qualified interpreters and written information in other formats, to people with disabilities to communicate effectively with us. BCBSAZ also provides free language services to people whose primary language is not English, such as qualified interpreters and information written in other languages. If you need these services, call (602) 864-4884 for Spanish and (877) 475-4799 for all other languages and other aids and services.

If you believe that BCBSAZ has failed to provide these services or discriminated in another way on the basis of race, color, national origin, age, disability or sex, you can file a grievance with: BCBSAZ’s Civil Rights Coordinator, Attn: Civil Rights Coordinator, Blue Cross Blue Shield of Arizona, P.O. Box 13466, Phoenix, AZ 85002-3466, (602) 864-2288, TTY/TDD (602) 864-4823, crc@azblue.com. You can file a grievance in person or by mail or email. If you need help filing a grievance BCBSAZ’s Civil Rights Coordinator is available to help you. You can also file a civil rights complaint with the U.S. Department of Health and Human Services, Office for Civil Rights electronically through the Office for Civil Rights Complaint Portal, available at https://ocrportal.hhs.gov/ocr/portal/lobby.jsf, or by mail or phone at: U.S. Department of Health and Human Services, 200 Independence Avenue SW., Room 509F, HHH Building, Washington, DC 20201, 1-800-368-1019, 800-537-7697 (TDD). Complaint forms are available at http://www.hhs.gov/ocr/office/file/index.html
