ABORTION

Non-Discrimination Statement and Multi-Language Interpreter Services information are located at the end of this document.

Coverage for services, procedures, medical devices and drugs are dependent upon benefit eligibility as outlined in the member’s specific benefit plan. This Medical Coverage Guideline must be read in its entirety to determine coverage eligibility, if any.

This Medical Coverage Guideline provides information related to coverage determinations only and does not imply that a service or treatment is clinically appropriate or inappropriate. The provider and the member are responsible for all decisions regarding the appropriateness of care. Providers should provide BCBSAZ complete medical rationale when requesting any exceptions to these guidelines.

The section identified as “Description” defines or describes a service, procedure, medical device or drug and is in no way intended as a statement of medical necessity and/or coverage.

The section identified as “Criteria” defines criteria to determine whether a service, procedure, medical device or drug is considered medically necessary or experimental or investigational.

State or federal mandates, e.g., FEP program, may dictate that any drug, device or biological product approved by the U.S. Food and Drug Administration (FDA) may not be considered experimental or investigational and thus the drug, device or biological product may be assessed only on the basis of medical necessity.

Medical Coverage Guidelines are subject to change as new information becomes available.

For purposes of this Medical Coverage Guideline, the terms "experimental" and "investigational" are considered to be interchangeable.

BLUE CROSS®, BLUE SHIELD® and the Cross and Shield Symbols are registered service marks of the Blue Cross and Blue Shield Association, an association of independent Blue Cross and Blue Shield Plans. All other trademarks and service marks contained in this guideline are the property of their respective owners, which are not affiliated with BCBSAZ.
ABORTION (cont.)

Description:

Spontaneous Abortion:
Commonly referred to as miscarriage. The delivery or loss of the products of conception before the 20\textsuperscript{th} week of pregnancy without induction or instrumentation. Fetal weight is approximately 500 grams.

Non-Spontaneous Abortion:
Medically-induced abortion. The purposeful interruption of an intrauterine pregnancy with the intention other than to produce a live born infant. A medically-induced abortion can be by surgical or non-surgical means.

Non-Viability:
To a reasonable degree of medical probability, the fetus is not expected to live longer than 30 days outside of the womb. A fetus is not considered non-viable for purposes of this provision if a pregnancy is terminated at a stage of pregnancy too early to determine viability.

Viability:
To a reasonable degree of medical probability, the fetus is expected to live longer than 30 days outside of the womb.

Fetal and/or Multi-Fetal Reduction:
Fetal and/or multi-fetal reduction is the selective first-trimester termination of a fetus or fetuses. Selective termination of an anomalous fetus in a multiple pregnancy is usually a second-trimester procedure.

Surgical Abortions:
Surgical abortions include vacuum aspiration, dilation & evacuation, dilation & extraction and induction.
ABORTION (cont.)

Description: (cont.)

Non-Surgical Abortion:
Medications administered to induce abortion include:

Carboprost tromethamine (Hemabate®)
Hemabate is a prostaglandin administered intramuscularly. Used between the 13th and 20th gestational week, as calculated from the beginning of last menstrual period.

Dinoprostone (Prostin E2®)
Prostin E2 is a prostaglandin administered vaginally. Used between the 12th and 20th gestational week, as calculated from the beginning of last menstrual period.

Methotrexate
Methotrexate is an antimetabolite administered orally or as an injection. Used in combination with misoprostol to end an early pregnancy defined as 49 days (7 weeks) or less, as calculated from the beginning of last menstrual period.

Mifepristone (Mifeprex®)
Also known as RU-486. Mifeprex is an anti-progesterone administered orally. Indicated for use in a regimen with misoprostol, for the medical termination of intrauterine pregnancy through 70 days (10 weeks) gestation, as calculated from the first day of last menstrual period.

Mifepristone is available only through a restricted risk evaluation and mitigation strategy (REMS) program. Only a prescriber certified in the Mifeprex REMS program can obtain and dispense Mifeprex.

Misoprostol (Cytotec®)
Cytotec is a prostaglandin administered buccally, orally or vaginally. Cytotec can be used alone to induce abortion or as part of a regimen with mifepristone, for the medical termination of intrauterine pregnancy through 70 days (10 weeks) gestation, as calculated from the first day of last menstrual period.

Cytotec is administered or dispensed by a healthcare provider.
ABORTION (cont.)

Criteria:

Abortion:

COVERAGE FOR ABORTION IS DEPENDENT UPON BENEFIT PLAN LANGUAGE. REFER TO MEMBER’S SPECIFIC BENEFIT PLAN BOOKLET TO VERIFY BENEFITS.

- If benefit coverage for abortion is available, non-spontaneous, medically-induced abortion (by surgical or non-surgical means) of a fetus, including fetal and/or multi-fetal reductions is considered eligible for coverage.

- If benefit coverage for abortion is available, the following medications administered and/or dispensed in an office-based setting are considered eligible for coverage when given as part of a non-spontaneous, medically-induced abortion that is medically necessary and eligible for coverage:
  1. Carboprost tromethamine (Hemabate)
  2. Dinoprostone (Prostin E2)
  3. Methotrexate
  4. Mifepristone (Mifeprex)
  5. Misoprostol (Cytotec)

- If benefit coverage for abortion is not available, non-spontaneous, medically-induced abortion (by surgical or non-surgical means) of a fetus, including fetal and/or multi-fetal reductions is a benefit plan exclusion and not eligible for coverage.

Medically Necessary Abortion:

- Non-spontaneous, medically-induced abortion (by surgical or non-surgical means) of a fetus, including fetal and/or multi-fetal reductions is considered medically necessary and eligible for coverage when the treating physician certifies in writing ANY of the following:
  1. The abortion is necessary to save the life of the woman having the abortion.
  2. The abortion is necessary to avert substantial and irreversible impairment of a major bodily function of the woman having the abortion.
  3. The pregnancy is the result of rape or incest.

- Non-spontaneous, medically-induced abortion because the fetus is/will be non-viable is considered medically necessary and eligible for coverage. A fetus is not considered non-viable for purposes of this provision if a pregnancy is terminated at a stage of pregnancy too early to determine viability.
ABORTION (cont.)

Criteria: (cont.)

- The following medications administered and/or dispensed in an office-based setting are considered eligible for coverage when given as part of a non-spontaneous, medically-induced-abortion that is medically necessary and eligible for coverage:

  1. Carboprost tromethamine (Hemabate)
  2. Dinoprostone (Prostin E2)
  3. Methotrexate
  4. Mifepristone (Mifeprex)
  5. Misoprostol (Cytotec)

Medically Necessary Abortion for Plans Receiving Public Funds or Tax Monies That Have Elected This Benefit Option:

- Non-spontaneous, medically-induced abortion is considered medically necessary and eligible for coverage when the treating physician certifies in writing that the abortion is medically necessary in order to save the life of the mother or to avert substantial and irreversible impairment of a major bodily function of the woman having the abortion.

Note: Notwithstanding any other law, public monies or tax monies of this state or any political subdivision of this state SHALL not be expended directly or indirectly to pay the costs, premiums or charges associated with a health insurance policy, contract or plan that provides coverage, benefits or services related to the performance of any abortion unless an abortion is necessary to either:

  1. Save the life of the woman having the abortion
  2. Avert substantial and irreversible impairment of a major bodily function

- The following medications administered and/or dispensed in an office-based setting are considered eligible for coverage when given as part of a non-spontaneous, medically-induced-abortion that is medically necessary and eligible for coverage:

  1. Carboprost tromethamine (Hemabate)
  2. Dinoprostone (Prostin E2)
  3. Methotrexate
  4. Mifepristone (Mifeprex)
  5. Misoprostol (Cytotec)

Abortion for Plans Specifically Excluding Abortion:

- Non-spontaneous, medically-induced abortion is a benefit plan exclusion and not eligible for coverage.
